W. F. SCHMEISKE'S

Hardy Phlox List

NURSERY, ROBINSON STREET

Address: Hospital Station
BINGHAMTON, NEW YORK

We take pleasure in presenting herewith our list of Phlox which I think is as complete as it can well be made.

Some varieties have been eliminated because they have been supplanted by better ones, and those better varieties have been added as only the best are good enough.

SHIPPING CONDITIONS

I WILL SHIP ANYWHERE. PARCEL POST OR EXPRESS.
Sender will pay cost of shipment.

If your mail will reach you in 24 hours, 10c per doz. should be added, longer distances according.

I try to pack as light as consistent with safe shipping, using waterproof paper for packing.

Express charges can be collected on the receiving end.

Foreign Countries have to apply for shipping permits. Inquire at your Post Office for information; this does not apply to seeds.

I do not ship on credit.

Please mention how you want your plants shipped.

For reference as to my responsibility, Dunns or Bradstreets, First National Bank, or Chenango Valley Savings Bank, Binghamton.

Remittance: Send money order, or in small amounts send stamps in 1 or 2 cents, we carry no book account.

Acknowledgment of your order is sent out when received stating about when shipment will be made.

Notice also is sent out when order is shipped and if customers fail to receive their order in a reasonable time should notify me so that it can be traced.

Claims for damages should be made on receipt of goods.

I aim to send out the best plants obtainable, but in some instances varieties will not grow as large as others, hence, there always will be variation in size of plants, particularly the reds and crimsons are not as strong as the other sorts.

DIRECTIONS AND INSTRUCTIONS

When plants are received from the nursery, unpack them at once. I would say regardless of what condition the roots are in, put them in a pail of water for an hour.

Planting: This should be done in the evening although this is not absolutely necessary for the best well-doing. Plant plants 16 inches in the row and two or three feet between the rows; plant them two or three inches deep, spread out the roots so they will do service and give the plant a good start; tramp the roots down hard with your feet, this will not be too much. After the ground starts to freeze, cover it over with a litter of horse manure, leaves or anything else of a similar material and the plants will come through all right and start to growing in the Spring and give abundant flowers during the following Summer.

Culture: If the Summer is dry, water should be supplied as on the lawn or the garden in order to keep them growing. In the wet season, mildew is apt to make its appearance and should this occur, dust powdered sulphur on the leaves in the morning when they are wet; in doing this, the sulphur will stick. In order to detect mildew, a white mold will make its appearance on the top of the leaves and draw them together so that they cannot do their function.

When a lengthy, dry season sets in, red spiders are apt to make their appearance—they only appear in dry weather. Soap-suds sprayed on the underside of the leaves will curb them; clean water can be used but in that case the force of the water will have to knock them off. If soap-suds are used, it is well to spray with clear water after, to wash off the suds.

The red spider is a small spider not readily detected with the natural eye but can be detected by a rusty yellow appearing along the ribs and the deeper parts of the leaves, usually on the under side. Keep the soil stirred and plants growing and the above will not bother you.

Before planting Phlox the soil should be well enriched with manure as they usually remain in the ground for several years and are strong growers and feeders.

The planting of Phlox should be done from the latter end of September until a very hard frost stops all plant-life. But the order for Phlox should be given as early as possible. Fall is the proper time to transplant Phlox, but the work can be done early in spring. The plants will be strong and all of such a size that they will give absolute satisfaction the first year as to growth and flowers.

My nursery is inspected every year, hence healthy stock is sent out.

Please send your order as soon as possible, in that way it can be shipped whenever the plants are ready.

This is perhaps the largest Phlox list in this country and I claim to have every thing that is good in Phlox.

Any plant not true to name will be replaced free of charge.

All correspondence will get careful attention.

In order to get a better understanding in nomenclature, I would like to extend an invitation to all those interested in Phlox culture to form a Phlox Society for no other purpose than to straighten out the Phlox, and get them named correctly. At present they are in a most hopeless condition.

Nurserymen are sending out anything and under any name. This ought to be corrected and it is up to the Phlox lovers to do it, hence the call for such an organization. There will be no charge, at least not until there are expenses, such as printing, advertising, etc.

I have had a great number of calls for such an organization and we need it, send me your name.

In closing, I wish to thank my patrons and friends for their patience and cooperation and hope we may work with the same zeal in the future.

Assuring you always to work with the best effort to do all in my power for your advantage, I am,

Sincerely yours,

W. F. SCHMEISKE.

PHLOX

(Paniculata Decussata)

VARIEGATED

		In Flower	Price
95	ASTIR REHU. Violet purple, half of each. Petal lighter. 3 feet....	July 26	
238	DR. S. ANDRAL KILMER. Variegated, red on white ground, some flowers heavy, some lighter, variegated. 1½ feet; flower 1½ inches	July 31	30c
53	LA REVE. White, pink penciled, 3 feet.....	Aug. 1	
42	RAYOUNAUT. Variegated, very odd, crimson rose with lavender stripes. Large clusters. 3 feet.....		

DARK MAROON

115	M. WISE. Deep purple. 1½ feet.....	July 26	35c
117	VON HOCHBERG. Brilliant red. Very dark. 3 feet.....	July 27	35c
	B. COMTE. Brilliant rich french purple		

DEEP PURPLE

10	LE MAHDI. Deep purple. Changes to deep blue with age. 2½ feet	July 10	30c
41	MARIETTA. Purple. Large flower. Light halo.....	July 22	

MAUVE

140	DANIEL LESSEUR. White, shaded pale blue. 2½ feet.....	July 28	
7	LA VAGUE. Beautiful combination of pink and lavender-eye. Free flowering, good grower. Very showy. 1½ feet.....	July 15	
18	PROF. SCHLIEMANN. Light mauve, with crimson carmine eye. Very pretty. 1½ feet	July 15	
142	SINDBAD. Rosy mauve, carmine eye. Large flower.....	July 20	

REDDISH CARMINE

33	ECLAIREUR. Reddish carmine, dark eye. Lighter halo. Very showy. Large flower and cluster. 2 feet.....	Aug. 1	
16	HUXLEY. Light carmine rose, deeper center. 3 feet.....	Aug. 7	
	GOLIATH. Bright carmine with a deep red center.....	Aug. 1	30c

PINK PHLOX

335	JULES SANDEAU. Large fine rose pink.....		30c
72	ATALA. Clear dark pink. Lighter center. 2 feet.....	Aug. 10	
28	ATHIS. Deep pink, overlaid salmon. Crimson eye.....	July 29	
68	BOUNTAIN. Deep rose. Deeper center. Free flowering. 2½ feet	July 26	
97	AURORA BOREALIS. Salmon pink, white halo, dark center.....	July 28	30c
164	A. MICHAUX. Flowers large, deep tender rose with carmine eye. 1½ feet	Aug. 7	30c

17	FANTOME. Heliotrope. Deep lilac center. Large flower. 2½ feet	July 25	
84	MINERVA. Deep lavender pink. Tyrion red eye. 2 feet.....	Aug. 1	
93	MOTTLED PURPLE. Deep lavender with light shading. Large flower	July 26	

RED PHLOX

102	ARNOLD TURNER. Fiery crimson scarlet. Finely colored. Large flower. 2 feet	July 15	35c
2	BOULE DE FEU. Salmon scarlet. Dark crimson eye. 2 feet.....	July 15	35c
116	COQUELICOT. Pure scarlet. Deep eye. 3 feet.....	July 20	35c
211	GEN. VON HEUTZ. Salmon scarlet, light halo, light crimson eye, 1 foot, flower 1½ inches.....	July 28	35c
65	HAMBEAN. Orange crimson, maroon eye. Good cluster. Late. 2½ feet	Aug. 1	35c
59	JOCELYN. Bright salmon red. 2½ feet.....	July 30	35c
326	MAD. P. LANGIER. Bright red, vermillion center.....	July 30	35c
118	LAMBOIRE. Brilliant orange salmon, crimson center. 2½ feet.....	July 27	35c
124	MATADOR. Orange scarlet. Crimson eye.....	Aug. 1	35c
166	MONTCERVIN. On order of Coquelicot. Not as brilliant. 1½ feet	Aug. 5	30c
170	SIEBOLD. Fiery orange. Maroon eye.....	Aug. 1	35c

NEW TYPE (Phlox Arends)

331	GRETE. Plant of very branching habit, 20 inches high, producing great masses of medium-sized white flowers.....	35c
332	CHARLOTTE. Growing 18-24 inches high, flowers pale lilac shaded pink with a prominent dark eye.....	35c
333	KATHE. Stems loosely branching, about 20 inches high, flowers purplish rose with a dark eye.....	35c

EARLY PHLOX (Suffruticosa)

313	EMPRESS. Similar to Indian chief but larger flowers.....	July 1	35c
137	MISS LINGARD. White, delicate pink center. Beautiful flower. Good truss. 3 feet.....	June 20	35c
98	DR. HORNBY. White overlaid with pink. Crimson center. Good. 1½ to 2 feet.....	June 20	35c
307	ROSE GEM. Pink lavender.....	July 1	35c
311	DIVARICATA CANADENSIS. An early flowering native. Species with lavender flowers	June 15	30c

*25c each except where noted.

These early Phlox ought to have a place in every collection. The clusters are good, large heads, and flower the season through without let-up. The foliage is shiny green, very showy.

WE can supply seeds of Phlox in the fall which should be sown as soon as received; it will come up the following spring. \$3.00 per ounce.

LATEST INTRODUCTIONS

- MICHAEL BUCHNER.** Dark purple.
- BARON VAN HECKEREN.** Excellent salmon pink.
- MRS. RUTGER.** Very light rose lilac, with slightly darker eye, broad trusses.

Above 50c each

The best friend is a flowering plant,
Will cheer in sorrow and joy,
Will give you all encouragement,
Just when you are most tried.

From early spring till late in fall,
It strives to show its wonders,
Particularly if it had
Some help from you through summers.

The blossom is most encouraging,
In all colors of the realm,
The foliage is also beautiful,
When the sun calls it in charm.

So month by month it works away,
To help you enjoy life,
When finally it lays down its work,
Well done the Master said.

Should we not also take a turn,
To imitate this plant
To scatter sunshine as we go,
Through bright and dreary days.

W. F. SCHMEISKE.
